fadata insfocus

Intelligence That Drives Insurance Performance

Unlock instant insights, automate reporting and accelerate profitability

From Data Overload to Business Advantage

Insurers are often drowning in data but starving for insights. With Fadata + InsFocus, insurers can finally **unlock the full value of their information, tracking performance in real time** across underwriting, claims, and Portfolio Managementwhile eliminating manual reporting through automated, ready-to-use dashboards.

This joint solution combines Fadata's INSIS platform with InsFocus' insurance-native business intelligence, delivering **faster, smarter decisions powered by a single source of truth.**

Unlike generic BI tools, it's fully integrated, pre-configured, and designed specifically for insurance, enabling value in weeks, not years, and turning complex data into a clear driver of profitability, efficiency, and growth.

Business Value at a Glance

Faster Decisions, Lower Risk
Real-time KPIs across underwriting, claims, and policy operations, allowing faster interventions and reducing financial leakage.

Improved Profitability
Automated analytics uncover trends in loss ratios, premiums, and bonus-malus.

Customer & Distribution Insights
Better tracking of sales, churn ratios and marketing ROI to refine distribution strategies and strengthen customer engagement.

Compliance & Governance
With a single source of truth, data is structured, transparent, and auditable.

Operational Efficiency
Pre-integrated dashboards remove manual reporting, cut reporting time and free teams to focus on value-adding analysis.

Scalable & Future-Proof
Modular and plug-and-play setup that grows with your needs, supporting new lines and markets.

From Raw Data to Real Insights

Gain a single version of truth that drives growth, profitability, and confidence in every decision.

01.
Operational Data Store (ODS)

Raw INSIS data is transformed into a clean, business-friendly structure with intuitive labels.

02.
Operational BI

Real-time KPIs track performance in sales, customer churn, and claims, enabling immediate course correction.

03.
Analytical BI

Advanced models deliver insights into premiums, loss ratios, and renewal behavior, ready without complex setup or hidden costs.

Claims Intelligence & Fraud Detection
Claims & Risk Teams

InsFocus transforms claims data from INSIS into actionable insights that reveal cost drivers, processing bottlenecks, and suspicious patterns. Teams can quickly spot anomalies, shorten settlement times, and reduce leakage.

- Detect outliers and fraudulent claims faster with visual analytics.
- Improve efficiency and trust through transparent, data-backed claim handling.
